

# Schedule

## 4 Reports:

### **Report 1: due 10am, 19th September. 5%.**

Depending on your role, significant technical, conceptual, artistic etc. groundwork has been done and demonstrated. A series of class outcomes has been decided and roles have been assigned.

### **Report 2: due 10am, 3rd October. 10%. (Along with major project presentations).**

Full conceptual and technical demonstrations have been provided demonstrating a clear roadmap for the following month's implementation. Projects have developed a strong identity and clear technical and conceptual value. Although not complete, they should be easy to demonstrate and 'sell' to people. Individuals have been assigned clear goals leading to the following report.

### **Report 3: due 10am, 24th October. 25%.**

Individual progress report. Individuals address their goals in response to the previous report. Explain successes. Address problems that arose, analyse and present clear strategy for moving forward. Projects should already have accumulated sufficient and attractive documentation at this stage (documentation is not a last-minute thing).

### **Report 4: due 10am, 7th November. 45%. (Along with final project presentations + demos).**

Projects should be complete, working, well-presented and documented. A clear plan for install should exist, along with plans for the running of the exhibition.
